DETAILED ACTION

This office action follows a response filed on April 6, 2007. Claims 1-12 are pending.

Page 2

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Application/Control Number: 10/517,828

Art Unit: 1713

4. Claims 1, 2, 5, 8, 11, and 12 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kurokawa *et al.* (*J. Mat. Sci. Letts.*, 1996).

Kurokawa *et al.* discloses a composition comprising a melt blend of polypropylene base resin, maleic acid modified polypropylene (compatibilizing resin), and modified clay, wherein the amount of filler is 3 wt % (page 1483). Since equal amounts of maleic acid modified polypropylene and modified clay are pre-mixed, it follows that the composition contains 3 wt % of maleic acid modified polypropylene. The reference is silent with respect to the spectral properties of the compatibilizing resin, however, in view of the fact that the compatibilizing resin is prepared with maleic acid, and not maleic ahydride, a reasonable basis exists to believe that it exhibits properties Pc1 and PcH, as recited in instant claim 1. Since the PTO can not conduct experiments, the burden of proof is shifted to the Applicants to establish an unobviousness difference. *In re Fitzgerald*, 619 F.2d. 67, 205 USPQ 594 (CCPA 1980). See MPEP § 2112-2112.02. *In re Best*, 562 F.2d 1252, 1255, 195 USPQ 430, 433 (CCPA 1977).

5. Claims 1, 2, 4, 5, 6, 8, and 10-12 are rejected 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Mehta et al. (U.S. 6,844,389).

Mehta et al. teaches a preparation of polyolefin/clay nancomposite by melt blending 76-99.25 wt % of ethylene homopolymer or ethylene copolymer, 0.5-12 wt % of organically modified clay, and 0.25-12 wt % of compatibilizing agent that is a polymer of ethylene having from 0.1-8 wt % of ethylenically unsaturated carboxylic acid monomer copolymerized therewith or grafted thereto (claim 1). The inventors teach maleic acid as the unsaturated carboxylic acid monomer (col. 6, line 27). The reference is silent with respect to the spectral properties of the compatibilizing resin, however, in view of the fact that the compatibilizing resin is prepared with maleic acid, and not maleic ahydride, a reasonable basis exists to believe that it exhibits properties Pc1 and PcH, as recited in instant claim 1. Since the PTO can not conduct experiments, the burden of proof is shifted to the Applicants to establish an unobviousness difference. In re Fitzgerald, 619 F.2d. 67, 205 USPQ 594 (CCPA 1980). See MPEP § 2112-2112.02. In re Best, 562 F.2d 1252, 1255, 195 USPQ 430, 433 (CCPA 1977).

Page 4

6. Claims 3, 7, and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. None of the cited references teaches use of non-ionic surfactant as the intercalant in the layered silicate filler. Each of the references discloses organic modification of clays with onium compounds, and therefore, one having ordinary skill in the art would not find it obvious to replace partially or completely the onium compound with non-ionic surfactant, and one would not find it obvious to combine onium compound with non-ionic surfactant.

Response to Arguments

7. Applicant traverses the rejection of claims over Mehta et al., set forth in the previous office action. Applicant's arguments, have been considered fully, and are persuasive. As indicated by Applicant, maleic anhydride modified polyolefin would not exhibit the claimed Pc1 and PcH values. Consequently, the rejection has been withdrawn. The rejection of claims over Dontula et al. in view of Mehta et al. has also been withdrawn.

Mehta et al. has been applied to the instant claims with new grounds of rejection. Kurokawa et al. represents a newly discovered reference which is applicable to the instant claims. As such, this office action remains non-final.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rip A. Lee whose telephone number is (571)272-1104. The examiner can be reached on Monday through Friday from 9:00 AM - 5:00 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu, can be reached at (571)272-1114. The fax phone number for the organization where this application or proceeding is assigned is (571)273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on the access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll free).
